

Fold each printed sheet in half lengthwise. The left side of the document will list the term and the right side will list the definition. Tape or staple the open edges of your flashcards. Cut out your flashcards on the solid lines indicated and fold them on the dotted lines.

Module 1
*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Agile supply chain

APICS CTSC Learning System © 2025

The ability to respond quickly to unpredictable changes in customer needs by reconfiguring operations.

Module 1
*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Balanced scorecard

APICS CTSC Learning System © 2025

A list of financial and operational measurements used to evaluate organizational or supply chain performance. Dimensions might include customer perspective, business process perspective, financial perspective, and innovation and learning perspectives. It formally connects overall objectives, strategies, and measurements. Each dimension has goals and measurements.

Module 1
*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Buffer

APICS CTSC Learning System © 2025

In theory of constraints, time or material that supports throughput and/or due date performance.

Module 1
*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Business context summary

APICS CTSC Learning System © 2025

Used in the S: Set the Scope phase of the SCOR Racetrack to identify and document the business and establish a high-level view of the competitive landscape. Composed of a business description, challenges and opportunities, a value proposition, critical issues, risks, financial performance, an internal structure profile, and an external profile.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Constraint

APICS CTSC Learning System

© 2025

Any element or factor that prevents a system from achieving a higher level of performance with respect to its goal.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
DMAIC

APICS CTSC Learning System

© 2025

A six sigma improvement process composed of five stages: (1) Define - Determine the nature of the problem; (2) Measure - Measure existing performance, and commence recording data and facts that offer information about the underlying causes of the problem; (3) Analyze - Study the information to determine the root causes of the problem; (4) Improve - Improve the process by effecting solutions to the problem; and (5) Control - Monitor the process until the solutions become ingrained.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Gemba

APICS CTSC Learning System

© 2025

The place where humans create value or the real workplace. Also a philosophy: "Go to the actual place; see the actual work."

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Genchi genbutsu

APICS CTSC Learning System

© 2025

A Japanese phrase meaning to visit the shop floor to observe what is occurring.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Lean six sigma

APICS CTSC Learning System

© 2025

A methodology that combines the improvement concepts of lean and six sigma. It uses the seven wastes of lean and the define, measure, analyze, improve, control (DMAIC) process from six sigma and awards recognition of competence through judo-style belts.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Poka-yoke

APICS CTSC Learning System

© 2025

Mistake-proofing techniques designed in a way to prevent an error from resulting in a product defect. For example, in an assembly operation, if each correct part is not used, a sensing device detects that a part was unused and shuts down the operation.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Postponement

APICS CTSC Learning System

© 2025

A product design or supply chain strategy that deliberately delays final differentiation of a product (assembly, production, packaging, tagging, etc.) until the latest possible time in the process. This shifts product differentiation closer to the consumer to reduce the anticipatory risk of producing the wrong product. The practice eliminates excess finished goods in the supply chain. This strategy is sometimes referred to as delayed differentiation.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Quality

APICS CTSC Learning System

© 2025

Conformance to requirements or fitness for use.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term

Root cause analysis

APICS CTSC Learning System

© 2025

Analytical methods to determine the core problem(s) of an organization, process, product, market, and so forth.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term

Six sigma

APICS CTSC Learning System

© 2025

A methodology that furnishes tools for the improvement of business processes. The intent is to decrease process variation and improve product quality.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term

Six sigma quality

APICS CTSC Learning System

© 2025

A set of concepts and practices that focuses on reducing variability in processes and reducing deficiencies in the product. Important elements are (1) producing only 3.4 defects for every 1 million opportunities or operations and (2) process improvement initiatives striving for six sigma-level performance.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term

Total quality management (TQM)

APICS CTSC Learning System

© 2025

A management approach to long-term success through customer satisfaction; based on the participation of all members of an organization in improving processes, goods, services, and the culture in which they work.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Value chain

APICS CTSC Learning System

© 2025

The functions within a company that add value to the goods or services that the organization sells to customers and for which it receives payment.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Value chain analysis

APICS CTSC Learning System

© 2025

An examination of all links a company uses to produce and deliver its products and services, starting from the origination point and continuing through delivery to the final customer.

Module 1

*Section B: Value Proposition, Methodologies,
and Organizational Design*

Term
Value stream mapping

APICS CTSC Learning System

© 2025

A lean production tool to visually understand the flow of materials from supplier to customer that includes the current process and flow as well as the value-added and non-value-added time of all the process steps. It is used to help reduce waste, decrease flow time, and make the process flow more efficient and effective.
